SECTION 6.6 FROM RUMPKE CONTRACT

6.6 **Adjustment for Changes in Cost of Fuel** The Contractor shall apply a fuel adjustment to each Residential Unit's monthly invoice if the price of diesel fuel increases or decreases over the established base price during the term of this Contract or any extension years. The established base price of diesel fuel is \$2.86 per U.S. gallon. The established base price of diesel fuel was the price of diesel fuel the week the bids were opened as reported by the U.S. Department of Energy, Energy Information Administration (EIA) Midwest On-Highway Retail Diesel Price.

Any fuel adjustment shall be applied as either a credit or a charge as a separate line item on the invoice, using the following Fuel Adjustment Table. To determine if a fuel adjustment is warranted, the Contractor and the Township shall use the price index published on the US Department of Energy website www.eia.doe.gov. The price to be used is the EIA Midwest On-Highway Retail Diesel Price.

The fuel adjustment shall only be applied to the difference in the base price of \$2.86 per gallon as posted for the last week of the billing period. The adjustment equals 0.5% for every \$0.10 increase or decrease in the per gallon price of fuel above the base price. If the increase or decrease is within a range posted in the table, then a fuel adjustment shall not be applied. To calculate the adjustment, multiply the applicable adjustment percentage as shown in the following table to the total monthly invoice. This amount shall be applied as a credit on the invoice if the price of fuel decreases from the base price; alternately, this amount shall be applied as a charge on the invoice if the price of fuel increases over the base price. The fuel adjustment formula shall continue to be applied at the same incremental rate if the fuel price continues to rise above or below the prices indicated on the table.

Fuel Adjustment Table
